Cutlery polisher – The Power Model

Made in Germany

NEXT GENERATION

Original differs from the picture

TECHNICAL DATA

dimension transverse (lxwxh):	81 x 78 x 106 cm
Dimensions longitudinal lie:	78 x 81 x 106 cm
weight:	120 kg
installed load max.:	1.000 W
power supply:	220-240 V – 50/60 Hz
Price:	\$18,450 - ex GST

YOUR ADVANTAGES AT A GLANCE

- ▶ **quick and efficient**
dries and polishes up to 8.000 cutlery pieces per hour in only one working step
- NEW** Much quicker warm up time due to increased working temperature
- NEW** New control unit displays replacement of granulate and equipped with an automatic final drying process
- NEW** Cutlery insert on the side for less jammed cutlery
- NEW** Carrier with cutlery boxes available
- NEW** Movable by extra robust rollers
- ▶ **cost-saving and economic**
low operating expenses and cost-savings due to the gain of time
- ▶ **clean and hygienic**
the cutlery looks like new and is sterilized by an UVC-lamp
- ▶ **user-friendly and low-maintenance**
simple and safe handling due to the well-thought-out design
- ▶ **service-orientated and guaranteed**
we offer spare parts-guarantee and service

The clean and wet cutlery is given directly from the dishwasher baskets on the chute.

The cutlery is spirally transported upwards through a high-grade granular substance and is dried and polished. The installed ventilator prevents that granulate comes out of the machine.

The regular use of TD 8000 FILL & GO keeps your cutlery shining.

The simple operation of TD 8000 FILL & GO

Whether chromium, stainless steel or even high-grade silver – the clean and wet cutlery is given directly from the dishwasher into the cutlery polishing machine TD 8000 FILL & GO.

Via the internal vibrating conveyor it is spirally transported upwards through a high-grade granular substance. This purely natural product dries and polishes your cutlery and keeps it shining – with just a single run. The granulate has to be exchanged every 4 – 8 weeks depending on the frequency the machine is used. The machine operates very quietly due to a special coating.

Your cutlery will not only pass the inspection by your guests, it even meets the strict EU-Hygienic Guidelines: a special UVC-lamp sterilizes both, the cutlery and the granulate.

The constant use of the TD 8000 FILL & GO reduces the oxidation of cutlery in a remarkable way and makes it look noticeably better.

Special technical features

- ▶ Ready for operation display
- ▶ Function test with display of UVC-lamp
- ▶ Built in fan for perfect shine
- ▶ Robust lockable castors for easy transport

Carrier with cutlery boxes
